### Name of property

*Now, I know we're pals and all that, but books are not Movable Type blog posts and we do not write paragraphs with blank lines between them and no indention. (We are not "typesetting" an O'Reilly "book.") Apart from simply being wrong and leading to ambiguities when a paragraph ends a page, I find it induces me to leap to the next graf at the tiniest hint of disinterest. Do please fix.*
